PROFILE

Motivated and passionate Full Stack Developer in training, currently learning the MERN stack with a strong foundation in HTML5, CSS, Bootstrap v5.3, and version control tools like Git and GitHub. Proficient in C and C++, actively improving problem-solving skills by learning DSA for web development using C++. A creative and detail-oriented professional logo designer, delivering impactful brand visuals. Currently participating in the 100 Days of Code Challenge and writing blogs on Medium, sharing valuable insights and lessons learned throughout the journey as a full-stack developer.

MY PROJECT

Frontend Projects

- Responsive Business Portfolio Website – A fully responsive Business Portfolio Website built using HTML5, CSS, and Bootstrap v5.3.
- A comprehensive project undertaken for Krishna Automobiles, focused on enhancing brand visibility and user engagement through creative design and technical solutions. The project involved crafting professional design elements, potentially including a user-friendly website, optimized branding materials, or digital marketing assets to elevate the company's online presence.

Problem-Solving and Algorithm Projects

- Armstrong Number Checker – A program to check Armstrong numbers using C++ and DSA techniques.
- Sum of Digits Calculator – A simple program to find the sum of digits of any number.
- Palindrome Number Validator – Validates whether a number is a palindrome or not.

Design Projects (Logo Design)

- Brand Identity Logo Design – Created unique logos for multiple businesses and digital brands.
- Attention to Detail: Ensuring every design element is perfectly crafted for optimal brand presentation.
- Creative Branding: Developing distinctive logos that align with business values and vision.
